DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-2, 4-9, 11-16, 18-24, 26-36, 38-44 and 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chancey et al. (US Patent No. 5,842,185) in view of Atkins (US Patent No. 4,953,085).

As per claims 1-2, 4-9, 11-16, 18-24, 26-36, 38-44 and 46, Chancey et al disclose a system and method for the operation of a financial account. The system and method comprise collecting and transmitting at least daily financial transactions data from a plurality of financial institutions for a plurality of users (see column 4, lines 4-42) as Chancey et al teach a plurality of financial institutions transmit a customer's financial information using respective computers to a remote source (similar to the claimed "database accessible from a server"). Chancey et al further teach prompting one of the pluralities of users for viewing financial information. Chancey et al also teach requesting from the database, financial transaction data for a customer's first and second account having a related first and second account number. See column 5, lines 24-35 of Chancey et al. Chancey et al also teach presenting the financial transaction

Application/Control Number: 10/765,011

Art Unit: 3692

data for the first and second account numbers to the one of the plurality of users. See also column 5, lines 24-35 of Chancey et al.

The only difference between Chancey and the claimed invention is that Chancey et al do not prompt the one of the plurality of users for individual first and second account number for financial transaction data from a respective first and second financial institution. As per this limitation, the Examiner asserts that this is a trivial difference as such would have been obvious to one of ordinary skill in the art to modify Chancey et al by providing users the choice to view only selected financial transaction data as would have been desired.

The system and method of Chancey et al perform similarly to an OnLine system and method. The only difference between Chancey et al and the claimed invention is that Chancey et al do not explicitly state that a user may access their particular account via a website or a browser. However, Chancey et al state that a user accesses these data remotely and customers' account data are retrieved from remote files for incorporated into their computer system. See column 5 and figure 4 of Chancey et al.

Systems for using a remote computer to access remote data from a server was well practiced in the art at the time of the applicant's invention. Atkins states that through their system, a user or client may access news or financial information via CompuServe which is a web enabling system as Atkins states:

"Through the system of the invention the client can also access a host of ancillary investment news, information, advice, and counseling. In particular, a client can access a current news and information database such as Dow Jones News Retrieval.TM., The Source.TM. and Compuserve.TM" See column 9, lines 8-13.

Application/Control Number: 10/765,011

Art Unit: 3692

From these teachings or suggestions, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Chancey et al with Atkins by providing a user with the easy manner of accessing information from a remote server from anywhere in the world.

Chancey et al further teach creating and presenting to their clients a report comprising financial transaction data. See columns 4 and 5 of Chancey et al.

As per claims 3, 10, 17, 25, 37 and 45, Chancey et al teach transmitting the financial transaction data to an accounting software package at the one of the plurality of user's computer. See column 4, lines 6-22. In the system of Chancey et al., the user or client transmits their account file or financial transaction data to their accounting software file.

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3692

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frantzy Poinvil whose telephone number is (571) 272-6797. The examiner can normally be reached on Monday-Thursday from 7:00AM to 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Chilcot can be reached on (571) 272-6777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
